PROFESSIONAL PROFILE

Student backend developer with over two years of experience learning and building web applications using PHP, SQL/MySQL, JavaScript, HTML5, and CSS3. Experienced in developing database-driven applications, implementing CRUD operations, user authentication, session-based access control, and dynamic data processing. Built projects including the RGen Student Report Generator, which integrates PHP with a MySQL database to manage student records and generate academic reports.

TECHNICAL SKILLS

PHP • SQL / MySQL • JavaScript • HTML5 • CSS3

PROJECTS

RGen Student Report Generator

PHP | SQL/MySQL | JavaScript | HTML5 | CSS3

- Developed a web-based application for managing student information and generating academic reports.
- Implemented user registration, login, logout, and session-based access control.
- Built student management features using PHP and SQL/MySQL.
- Implemented CRUD operations for student records and academic scores.
- Created dynamic student reports with automatic calculation of totals, averages, grades, and performance remarks.
- Designed responsive interfaces using HTML5 and CSS3.

EcoTrack – Environmental Awareness Web Application

HTML5 | CSS3 | JavaScript | Bootstrap

- Developed a web application focused on environmental awareness.
- Created responsive web interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Implemented interactive sections and visual elements to improve the user experience.

YouTube Clone – Video Platform Interface

HTML5 | CSS3 | JavaScript

- Developed a YouTube-inspired video platform interface using HTML, CSS, and JavaScript.
- Implemented dynamically generated video cards using JavaScript data.
- Built a responsive video grid for desktop, tablet, and mobile screen sizes.
- Created a collapsible sidebar with mobile navigation support.
- Implemented dark mode and a back-to-top feature.
- Added skeleton loading elements for the interface.

EDUCATION

Salem Oxford International School

Secondary School Student • Expected Graduation: 2027/2028

CERTIFICATIONS & TRAINING

WEBBY[Coding] — Africa Kids & Teens Coding Club • 2025

ACHIEVEMENTS & ACTIVITIES

TechFest — Competition Participant & Project Presenter • 2025

- Participated in a technology competition at TechFest.
- Presented **EcoTrack**, an environmental awareness web application, as part of the competition.
